Election/Restrictions

Restriction to one of the following inventions is required under 35 USC 121:

- I. Claims 1-6, 14, 16, 18 are drawn to an image processing apparatus capable of performing first and second image processings classified in class 358/1.9
- II. Claims 7-19, 15, 17 are drawn to a data processing apparatus for sending and receiving image data to and from an image processing apparatus and for file replacement, classified in 358/1.15

Groups I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the image processing apparatus can process image data from a variety of sources and not necessarily use image data from the particular data processing apparatus of Group II. Also, Group II can deliver image data to any image processing apparatus capable of multiple processings and not necessarily the one in Group I. See MPEP § 806.05(d). There would be burden on the examination process because there would be a need for searching/consideration for two different inventions.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
